What Our Customers Say...

"I recently purchased Aurora 3.0 for my daughter. When I went down to install the software for her, I found her sitting at the computer using Aurora's word prediction to compose email using whole words rather than abbreviations. She had installed it herself and she had a smile from ear to ear. Thank you so much."

"I have owned my copy of Aurora for Windows for about a year now. It is hard for me to say what a great experience using your product has been for me. I had tried a few other products but I found all of them far less accurate than the Aurora system. Thank-you very much for all the work you have done. I wish you continued success. "

And so much more! ➔
